SUBJECT INDEX TO VOLUME 40, 1994

[A]

a new anamorphic yeast isolated from star apple 115
a new yeast species in Thailand 115
acid mine drainage 143
Acidiphilium 143
Acidiphilium multivorum, sp. nov. 143
acidophilic heterotrophic bacteria 143
Acinetobacter calcoaceticus 103
Actinomadura spadix 39-B 69
actinomycete 319
activated sludge 103
aerobic photosynthetic bacteria 287
Aeromonas hydrophila 339
alpha amylase 319
Alteromonas 499
amino acid sequence 43
amylase 339
Anabaena doliolum 123
anti-hyper cholesterolemic activity 533
antibiotic sensitivity 243
Aquaspirillum 75
Arg-Gly-Asp sequence 197
Aspergillus spp. 255
Aureobasidium pullulans 175

[B]

Bacillus sp. 53
Bacillus spp. 255
Bacillus subtilis 563
bacteriochlorophyll-containing bacteria 287
bacteriolytic enzyme 499
bacteriophage M2 197
Basidiomycetes 551
BCECF-AM (6-carboxylfluorescein, 2,7′-bis(2-carboxyethyl)-5(and -6)carboxy-fluorescein acetomethyl ester) 261
biocorrosion 227, 271
biodegradation tests of polyethylene films 445
biofilms 227

[C]

calmodulin 43
Candida cellulolytica, sp. nov. 519
Candida fukuyamanensis, sp. nov. 519
Candida sojae, sp. nov. 161
Candida stellimalicola, sp. nov. 115
carbaryl 569
carboxymethyl cellulase 53
cell surface charge 469
cellular location 53
cellulolytic *Prototheca* 519
cellulolytic yeasts 519
characterization of RepK protein 365
chemotaxonomy 287
chitinase inhibitor 171
cholesterol level 533
classification of cryophilic wine yeasts 83
coenzyme Q and morphogenesis 175
colony morphology variant 243
competent cell transformation 563
composting effects on polyethylene films 445
corrosive biofilm 271
cryophilic wine yeasts 135
cryophilic wine yeast *Saccharomyces bayanus* 83
culture age 297

[D]

2,4-D 569
Debaryomyces polymorphus var. *africanus*, var. nov. 331
dedikaryotization 551
demethylallosamidin 171
2-deoxy-D-galactose—bacteriocidal effect of 409
differentiation potential 209
DNA relatedness 397
DNA-DNA hybridization 287
Dunaliella tertiolecta 533

[E]

edible mushroom 551
electronic spectroscopic imaging 227
endoglucanase from *Xanthomonas albilineans* 421
endoglucanase gene sequence 421
energy-independent iron binding 23
enzyme activity 123
enzyme characterization 53
enzyme profiles 209

SUBJECT INDEX TO VOLUME 40, 1994

competent cell transformation 563
composting effects on polyethylene films 445
corrosive biofilm 271
cryophilic wine yeasts 135
cryophilic wine yeast *Saccharomyces bayanus* 83
culture age 297

[D]

2,4-D 569
Debaryomyces polymorphus var. *africanus*, var. nov. 331
dedikaryotization 551
demethylallosamidin 171
2-deoxy-D-galactose—bacteriocidal effect of 409
differentiation potential 209
DNA relatedness 397
DNA-DNA hybridization 287
Dunaliella tertiolecta 533

[E]

edible mushroom 551
electronic spectroscopic imaging 227
endoglucanase from *Xanthomonas albilineans* 421
endoglucanase gene sequence 421
energy-independent iron binding 23
enzyme activity 123
enzyme characterization 53
enzyme profiles 209

Escherichia coli 563
Escherichia coli ATCC-9637 35
Escherichia coli—cell wall synthesis 409
ethanol production 463
ethanol resistance of cryophilic wine yeasts 135
expression of an endoglucanase 421
extracellular matrix 227, 271

[F]
fedbatch, batch and continuous cultures .. 463
fermentation characteristics of *Saccharomyces bayanus* 83
fluorogenic substrates 209
fructose 1,6-bisphosphatase—inhibition by sugar phosphate 409
fungal fermentation of lignocelluloses 305
Fusarium oxysporum 43

[G]
Geotrichum candidum 171
gluconeogenesis—inhibition by sugar phosphate 409
Gram-positive cocci 181
grassland—bacteria 509
growth and fermentation of cryophilic wine yeasts 135
growth rate 469, 509

[H]
Hapalosiphon welwitschii 261
heavy metals 123
histone H1 gene 359
hybridization 359
hyperosmolarity 35

[I]
immobilization 349
initiation and termination of DNA replication of pKYM 377
intracellular pH 261
iron organic chelants 23
iron recycle 491
iron uptake 23
iron-citrate complexes 23
iron-oxidizing bacteria 349, 491
IS*1* deletion 563

[K]
kinetic studies 123

[L]
lipase 435
lipolysis 103
Listeria monocytogenes 63

[M]
macromolecular organization 53
Magnetospirillum 75
marine bacteria 499
marine microalga 533
melanin-synthesis deficient mutants 277
metal response 265
metal sequestration 265
microalgal diets 533
microculture of bacteria 297
Microcystis aeruginosa 261
mineral uptake 123
mitochondria 1
mitochondrial nucleoids 1
molecular characterization 63
morphogenesis and pullulan production 175
Mycobacterium 209

[N]
natural environment 15
Neisseria meningitidis 23
new ballistosporous yeast 95
new variety of yeast 331
new yeast from soybean flake 161
nitrogenase 569
Nocardia asteroides 319

[O]
Oceanospirillum 75
oligotrophic bacteria 469, 509
osmotic stress 35
osmotolerance 35

[P]
o-phenanthroline 491
Phormidium autumnale 15
phosphate-solubilizing microorganisms 255
phosphatidylcholine-defective mutant 389
phosphatidylethanolamine-N-methylation pathway 389
phosphatidylethanolamine-N-methyltransferase 389
plant pathogen 277
plasmid pKYM 365, 377
plate assay 255

polyamine 75, 181
polyethylene degradation 445
porin-like protein 477
predation 15
primer protein 197
promoters from *Zymomonas mobilis* 541
protease-metallo 339
protein-primed DNA replication 197
protoplast 551
protozoa and bacteria interrelation in the bovine rumen 215
Pseudomonas stutzeri RS 34 265
pullulan 175
purification of RepK protein of pKYM 365

[R]
radio-resistant bacteria 181
recombinant *Escherichia coli* 463
RepK protein of pKYM 365
replication origin of pKYM 377
resting forms 175
Rhizobium leguminosarum 569
rolling-circular replication 377
rumen microorganisms 215
rumen protozoa 215
rumen simulation technique (rusitec) 305

[S]
Saccharomyces cerevisiae 1, 359
Shiitake 551
soil-bacteria 297
solid medium 243
Spirillum 75
Sporobolomyces linderae, sp. nov. 95
starch-filled polyethylene 445
sugar phosphate—bacteriocidal effect of 409
sulphate-reducing bacteria 227, 271

[T]
Thecamoeba sphaeronucleolus 15
thermophilic *Bacillus* sp. 435
Thiobacillus ferooxidans 243, 349, 491
thiosulfate 491
Trichosporon asahii var. *coremiformis*, comb. nov. 397
Trichosporon asahii var. *faecalis*, comb. nov. 397
Trichosporon cutaneum 397
Trichosporon loubieri var. *laibachii*, comb. nov. 397

[U]
ultrastructure 271
uptake hydrogenase 569

[V]
vegetative compatibility groups 277
Verticillium dahliae 277
Vibrio parahaemolyticus 477
vital staining 1
volatile acids/rumen gases 305

[Y]
yeast 1
yeast chromatin 359
yeast lytic enzyme 69

[Z]
zinc resistance 265
zinc-induced morphology 265
Zymomonas mobilis mutant 389
Zymomonas promoters functional in *Escherichia* 541
